## GOODNESS OF STEAMING

The Tupperware Steam It helps in making delicious yet healthy steamed recipes. Try steamed vegetables, dumplings and momos. Steaming would make them light and easy to digest without adding any extra calories!

### Preserves nutrition

- In today's health & fitness conscious times, steaming vegetables has become a popular cooking method. It preserves the fibre, colour, and flavour of vegetables as well as B vitamins (riboflavin, thiamine, niacin, biotin, B12, pantothenic acid), vitamin C, and minerals like calcium, phosphorous, potassium and zinc.

### Enhances the natural flavor and appearance of food

- Steaming cooks food more evenly. Steam is gentle and uniform. It slowly diffuses through the food and allows it to cook in its own juices, thus enhancing the flavour of food.
- Unlike boiling, steaming brightens the colours of vegetables and doesn't turn them dull.

### Makes for healthier eating

- Unlike sautéing and frying, which require the addition of fat to facilitate the cooking process, steaming food cuts down the amount of oil going in the food, making it lighter.
- Steam cooking produces excellent results with almost any food, from vegetables and grains to meats and baked goods.

### Faster and more efficient food preparation

- Steam cooking allows multiple foods to be cooked at the same time, consuming less energy than it would take to cook the items separately.

### REPLACEMENT POLICY

Tupperware will provide the same replacement product in case of a quality issue as per policy above. However in case of non-availability of the same product or a component, we will gladly provide a comparable product in the same category or an option to choose a product or products of comparable value from the Ultimo and Tupperware catalogue.

- Company reserves the right to provide an alternate identical product in the event of non-availability of the original product.
- The colour of the replacement may vary from the colour of the original product.

The company maintains stock of selected spares, which can be purchased by the consumer.

## Caring for your Tupperware

Tupperware products are tested to ensure that they are a safe, non-toxic, attractive and durable alternative to other home storage products. With a little care, you can keep your Tupperware looking as good as new.

- **Cleaning and storing:** Wash and rinse Tupperware with liquid soap and lukewarm water. Store without seals to keep them fresh. Do not soak polycarbonate range in detergent or soap.
- **Hot food and beverages:** Cool beverages before applying the seal. Cool hot food or liquids containing fat (cooking oil/grease, curries, soups, sauces) before placing them in the container. Tupperware containers can withstand temperatures upto 80 °C.
- **Tight Seals:** Place the seal in warm water for few minutes. Dry thoroughly, then apply to container while still warm.
- **Stain Removal:** Use baking soda paste: It's ideal for reducing stains and stickiness.
- **Preventing Cuts and Scratches:** Avoid the use of abrasive scrubbers and washing powders.
- **Removing Unpleasant Odours:** A piece of charcoal or moist newspaper, stuffed into the container and left sealed for 12 hours in the fridge (before washing and rinsing the product thoroughly) should get rid of unpleasant odours.
- **Liquid Storage:** Only products with Classic Round Seal are liquid-tight and can be kept in any position. Place containers with any other type of seal in upright position.

## Use and Care Instructions:

### Smart Chopper

- Not recommended to use with hard food, as this could damage the cord mechanism and reduce the sharpness of the blades.
- Do not over-fill the container with oil.
- Never carry the Smart Chopper by the handle of the cord.

### Chef Series

- Do not leave an empty cookware with non-stick coating on a hot burner.
- Preheat cookware with little fat on low-to-medium heat for 1-2 minutes before adding food.
- Use only non-abrasive, non-chloride cleansers and a sponge.
- For the casserole cover with side holes for steam escaping, it is recommended not to direct the holes towards the handles to avoid over heating.

### Silicone Flower Mould

- Do not use knives or sharp utensils.
- Do not put on the stove top or close to a grill.
